

AD 180L

Open Loop Elevator AC Drive

Feature :

- AD180L Series High Performance Open Loop Vector Control inverter.
- Applying the most advanced sensor less vector control which keeps pace with the leading international level and 32-bit DSP system.
- The product enhances its reliability to meet the requirements of environment adaptability, customized and industrialized design with more optimized functions, more flexible applications and more stable performance.
- Modular design of Fans and Capacitor for easy replacement and maintenance.
- Emergency Power Supply (EPS) Function with Just a 220VAC Single Phase UPS.
- Double Safety protection examine, output phase loss at all time and check torque output before releasing the mechanical brake.
- Auto tune motor parameter without load disconnection.

Power Rating

- 3.7KW to 30KW,
Three-Phase (3 - Ø)
380 to 480VAC

Applications

- Use in Elevator having ACIM Geared Motor without Encoder.
- Compatible any tradition Panel.
